Skills

- Java | Python | JavaScript | C++ | C | SQL | Node | Express | Git | OOP
- Frontend | Backend | Full-Stack | English, Hindi, Urdu – All professional proficiency or above

Experience

Software Development

Cognifyz Technologies

Remote 05/2025 – 06/2025

- Developed a Python-based console application including a text-based quiz game and number pattern generator.
- Practiced debugging, modular programming, and code documentation.
- Strengthened problem-solving and software development skills through internship tasks.

Frontend Developer Intern

RogueCodes

Remote 11/2025 - 02/2025

- Contributed to development and improvements of the Rogue Codes company website with focus on responsive UI.
- Implemented and modified UI components for the Trusty Money web application using React.js.
- Improved user interface functionality and overall user experience.
- Collaborated with developers to implement frontend features and resolve UI issues.

Education

Bachelor of Science(Computer Science)

Abeda Inamdar Senior College

Pune, Maharashtra 06/2023 - Current

- Major in Computer Science with coursework in Data Structures, Algorithms, Database Systems, and Web Development

Projects

• **Four-Wheeler Service Center Management System:**

Developed a full-stack Four-Wheeler Service Center Management System using Node.js, Express, MySQL, and EJS that allows users to register, book vehicle services, make payments, and track bookings, while providing an admin dashboard to manage customers, services, and service records.

• **Complaint Management System(CMS):**

Developed a role-based Complaint Management System that allows students to submit and track complaints, while staff and administrators manage, update, and resolve issues through dedicated dashboards built using HTML, CSS, and JavaScript.

• **Carnival - New Tab Extension:**

Developed a Chrome extension using **JavaScript** and **Chrome Extension APIs** that replaces the default new tab page with a customizable dashboard featuring weather updates via **OpenWeather API**, multiple clock styles based on system time, quick notes, theme customization, and quick-access links.

Certifications

- **Agile Project Management Certifications:** Completed HP LIFE's Agile Project Management course, learning how to define a minimum viable product (MVP), understand iterative vs. incremental development, and apply Agile tools like Scrum and Kanban to improve teamwork, product development, and project delivery. (06/2025)
- **Basics of Data Structures and Algorithms:** Completed Simplilearn's course covering fundamental data structures and algorithm concepts including arrays, stacks, queues, and basic problem-solving techniques used in programming and software development. (05/2025)
